TJ Master at 301-428-9040 ext. 3119

---

Thank you for the opportunity to quote your firm on this project.

Page 2 of 2

Exclusions -Engineering, Layout, fine grading, seeding, sod replacement, permits, as-builts, liability for damage to private utilities, determination of property lines, engineered stamped drawings, traffic control, grounding, clearing of fence line, control points, materials testing, primary and secondary electrical work, padlocks on gates, any work not specifically described in quote.  
Wage Determinations, compliance fees for outside sourcing of payroll or insurance monitoring, fees for training classes, CCIP, OCIP  
Damage to any geogrid products due to the installation of our products.

**\*Prevailing Wage, Domestic materials, and LEED are not figured in this quote\***

Please note that all temporary fence is a leased product. All temporary fence shall remain the property of Long Fence and be kept in good repair by lessee.

*Please note: There will be an additional outside fee of \$200 for any outside online monitoring services associated with this order.*

Drug Screening requirements or safety classes required for Long Fence Employees will be an additional fee of \$250.00 per employee.

For Bridge Fencing Long Fence will not core drill holes for post plate bolts after a wall is poured if the wall rebar is not adjusted to accommodate core drilling.

If a wall is designed as slip form or precast a separate price may be given if requested and a copy of the rebar placement must be furnished prior to fence submittals.

**NOTICE:**

**Long Fence has been experiencing unmanageable increases in material pricing accompanied by shortages in available inventories far beyond prior market volatility. Long Fence has been notified that many products currently have significantly extended lead times that may have an impact on availability if orders are delayed.**

**Corporate Headquarters:**

## **CAPABILITIES STATEMENT**

### **OVERVIEW**

Founded in Washington D.C. in 1945, Long® Fence in its 76 plus years of existence has become one of the largest independently owned and operated fence contracting companies in the United States. Long® Fence has earned and maintained a strong reputation from performing projects in full compliance within the established scope of work and specifications. The company maintains five offices which are fully staffed with individuals who collectively possess generations of knowledge and experience allowing the company to manage the design and construction of security fencing and related products nationwide professionally, within budget and on time.

### **SECURITY SOLUTIONS**

Long® Fence has been a major provider of security solutions for tens of thousands of commercial, industrial and government projects for over 76 years. We are an established and proven partner to a wide range of clients whose common goal is to develop and provide a controlled site with restricted access in order to safeguard both their private and public assets. Given the company's further expansion into the fabrication of a variety of security product lines, clients are the recipients of the company's ability to truly customize product applications when required.

Whether the project is force protection for our military, or safeguarding of our infrastructure, industrial complexes, chemical plants, institutional facilities, schools, public buildings, depots, airports, prisons, municipal, state and federal institutions, bridges, ports, treatment plants, highways, rail transportation lines, conventions, inaugurations, special events and innumerable associated sites requiring differing applications, Long® Fence possesses the ability to design a multiplicity of product solutions.

Our goal is to resolve the critical task of monitoring and protecting those who have authorized access and to deter those whose entry must be restricted. The overall effectiveness of any security solution will also incorporate both aesthetic and budgetary considerations. The knowledge and experience that Long® Fence provides with respect to design expertise, and project management has benefited many business owners, developers and general contractors for decades. Our ability to develop and execute perimeter security projects within established parameters is a fundamental component to the success of the clients' objectives.
